

STERAMIST®

POWERED BY BINARY IONIZATION TECHNOLOGY®

STERAMIST® & THE TOMI™ SERVICE NETWORK

EPA-registered for use as a hospital-healthcare disinfectant and effective broad-spectrum surface disinfectant.

SteraMist® ionized Hydrogen Peroxide (iHP™) technology disinfects hard to reach surfaces, going above and beyond traditional sprays and wipes to disinfect and decontaminate a wide variety of pathogens. For facilities requiring single, routine, or emergency disinfection, **schedule SteraMist® service today.**

Utilizing SteraMist® technology, your TSN™ service provider will disinfect the area within minutes, and with a quick contact time, your facility can resume operations with only minimal downtime required.

SteraMist is currently listed on the EPA's **Lists G, H, K, L, M, and N** for efficacy against Norovirus, MRSA, C. difficile, Ebola, Influenza A, and SARS CoV-2 Coronavirus, respectively.

STERAMIST® FEATURES

- No wiping or rinsing required, and leaves no residue
- Bleach, chlorine, and silver ion-free
- Reduces risk of cross-contamination
- Non-corrosive with superior material compatibility, able to treat sensitive electronic equipment

TSN™ PROVIDERS SPECIALIZE IN:

- Effective High-Touch Surface & Full Area Disinfection
